

Praetorian Secure

Securing today for a safer tomorrow.

Praetorian Secure provides professional cybersecurity and compliance services to organizations of all sizes. Acting as your trusted advisors for anything cybersecurity related including compliance, penetration testing, strategy, application security, training, and more. Our goal is to improve your cybersecurity posture, confidence, and keep your critical assets secure from modern threats.

About Us

Our founders started Praetorian Secure in 2009 after serving several years as Agents of the Certifying Authority for the US Army and US Marine Corps. Since then, we have supported hundreds of organizations with NIST/FISMA compliance requirements and ensured they all achieve favorable accreditation decisions.

Compliance

Our Compliance Services help companies manage compliance more effectively. Continuous compliance is the best way to ensure all cyber threats are eliminated. Our experts will guide your team on how to meet Regulatory Compliance requirements on time.

- NIST 800 Series (800-171, 800-53, etc.)
- Cybersecurity Maturity
- Model Certification (CMMC)
- DoDI 8510.01 RMF

Consulting

Our experts work to improve your cyber resilience in a strategic manner. Sharing knowledge and building your teams confidence along the way. We can assist you on the journey towards better cybersecurity posture.

- Virtual Chief Information Security Officer (vCISO)
- Vulnerability Management
- Cloud Security Implementation
- Security Training & Awareness

Application Security

Manage your application risk by implementing our application security. Our cybersecurity engineers will provide application testing, secure code review, and educate application developers on secure coding practices. As a result, your application development process will become more secure through the identification and remediation of exploitable vulnerabilities.

Security Blogs

Our cybersecurity blog was developed to inform, educate, and guide business professionals on security practices.

Document Library

Our useful document library complete with templates and information regarding various security requirements.

Security Videos

An inside look at cybersecurity trends, interviews, and more.

Our Clients

Oakland County, Metlife, Points of Light, United Health, Welch, Xerox, Computershare, and more.

Defense Consulting

At Praetorian Secure, we understand the requirements to attain and maintain NIST compliance, while ensuring long-term monitoring and sustainable security. Our accreditation processes have been developed from years of serving as DoD auditors for both the US Army and US Marine Corps. This provides our customers with a unique knowledge base that allows us to engineer solutions that meet all DoD requirements from the start, remove costs associated with additional technical reviews following enclave completion, and ensure you receive a favorable compliance/accreditation decision.

Michigan Defense CyberSmart Program

The Michigan Defense Center is offering Michigan's small and medium-sized defense contractors a comprehensive one-stop shop to DoD cybersecurity compliance to save this nation's federal supply chain—and your business.

01

Standardized NIST Assessment

The initial step needed in determining your organizations compliance against NIST and CMMC requirements.

02

CMMC Level 1,2, & 3

Michigan connects you with services providers to complete POA&M, SSP, and other required artifacts.

03

Grant Program

\$22,500 available to qualified organizations to remediate deficiencies within your environment and become NIST compliant.

04

MDC Promotion

Bid Targeting System (BTS) records compliance and certification to assist DoD programs, Primes and companies identify potential suppliers in BTS.

Program Results

The program brings opportunities for Michigan businesses to offset costs by working with local experts. With a focus on enhancing cybersecurity and improving Defense contracting readiness, at a reduced cost.

Solution

From NIST compliance to Secure Software Development, we bring cutting-edge technology and experience together to solve the cybersecurity problem and secure the next-wave innovations of our clients.

Solution

Tailored and customized solutions developed for each individual client to ensure our security practices and your security posture are in line with your operational requirements.

The Praetorian Secure Advantage

- Former Agents of the Certifying Authority for the U.S. Army and U.S. Marine Corps
- Over 100 successful accreditation packages submitted for organizations of all shapes and sizes
- Customized policies and procedures tailored to your business needs and requirements.
- Experienced in working with the US Army, USAF, USN, USMC, TRICARE, DLA, FCC, SEC, MARSOC, and more.
